Manuscritp:

How Bacterial Vesicles Trigger Hearing Loss: The Role of Pyroptosis in Cochlear Damage

The authors have withdrawn this manuscript because [After submitting my article, I discovered some important missing data that is crucial for supporting my viewpoint and research findings. Although I tried to supplement this data through other means, I was unable to complete it before the deadline. Therefore, I believe the best approach is to withdraw the article so that I can further refine and present my research findings in a complete manner.]. Therefore, the authors do not wish this work to be cited as reference for the project. If you have any questions, please contact the corresponding author.

Dear members of the editorial department,

I am writing this letter to request the return of my submitted article "How Bacterial Vesicles Trigger Hearing Loss: The Role of Pyroptosis in Cochlear Damage". I sincerely appreciate the review and evaluation of my manuscript by you and your team, but I have decided to withdraw this article at this stage.

After submitting my article, I discovered some important missing data that is crucial for supporting my viewpoint and research findings. Although I tried to supplement this data through other means, I was unable to complete it before the deadline. Therefore, I believe the best approach is to withdraw the article so that I can further refine and present my research findings in a complete manner.

I sincerely appreciate the work you and your team have done during the review process, and I am grateful for your understanding and support. I am confident that after further refining my research, I will have the opportunity to submit my revised article to your journal again.

I hope you can understand my decision and kindly withdraw my article from the review process. If you need further information or have any questions, please feel free to contact me at any time.

Thank you for your understanding and cooperation.

Sincerely,

Zhixin Cao
