

Pseudo-Location: A novel predictor for predicting pseudo-temporal gene expression patterns using spatial functional regression

Kyungmin Ahn and Hironobu Fujiwara

Statement of withdrawal

The authors have withdrawn version 1 of this manuscript because a draft manuscript, which was still in the early stages of preparation and required major revisions including the replacement of the source RNA-seq datasets, was erroneously submitted. The authors do not wish this version to be cited as reference for this study. We will post a revised manuscript in the future. If you have any questions, please contact the corresponding author.
