

Supplementary Figure 1

A. DS1

B. DS2

Supplementary Figure 1. Characterisation of DS1 and DS2 sample composition. (A) DS1. (B) DS2. p : Wilcoxon rank-sum test p -values for age, and Fisher test p -values for gender ratios. Boxplots were generated using the boxplot function in R; the horizontal line represents the median, boxes extend between the first and third quartiles, and whiskers extend to 1.5 IQR (inter-quartile range) from the box. Notches mark $\pm 1.58 \text{ IQR}/\sqrt{n}$, where n represents the number of data points.
