

Figure S1

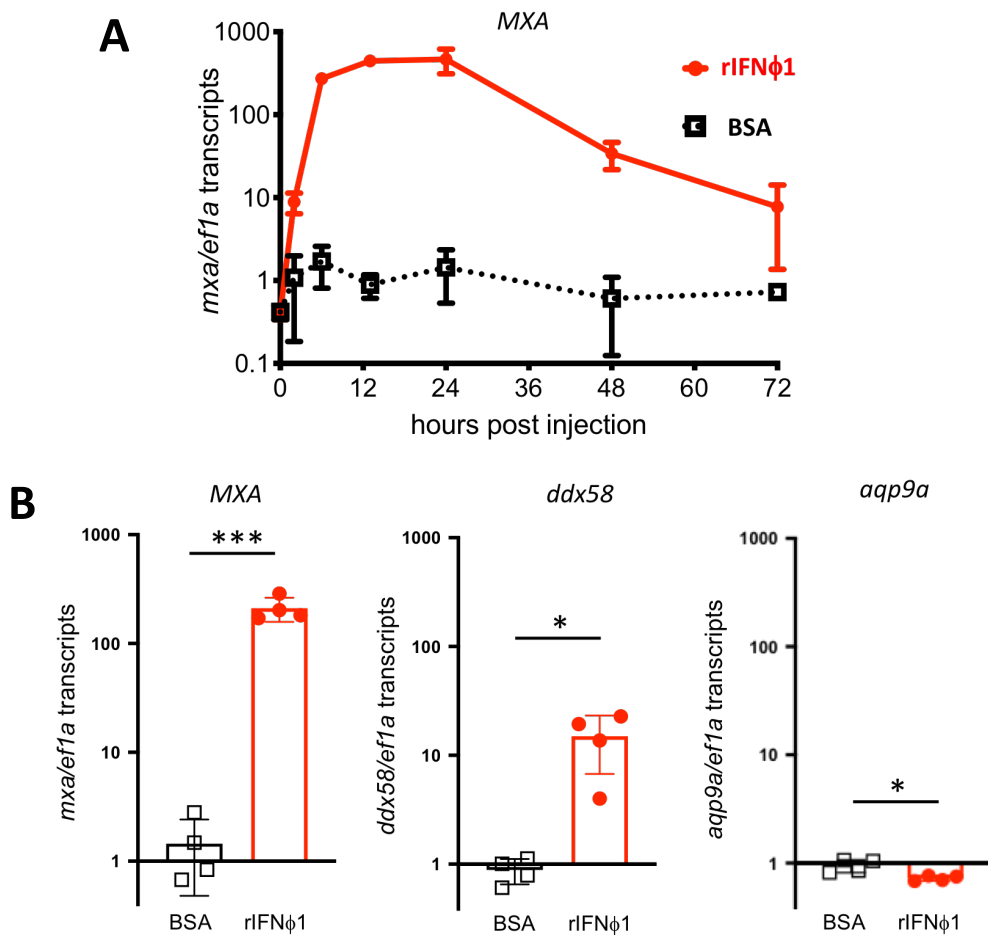

Figure S1. A. Kinetics of response to recombinant IFN ϕ 1, measured by RT-qPCR. Data normalized on the mean of expression of control (samples), displayed as mean \pm SD. **B. Genes missing in the reference genome: *ddx58***, encoding RIG-I, is a zebrafish ISG, but ***aqp9a* is not**. qRT-PCR in individual zebrafish larvae 6 hours after IFN ϕ 1 injection; quantification of *MXA* also shown as a control.
