# Appendix B

## Core areas of distribution

Based on predicted abundances, we identified the smallest sets of pixels including 50% of the population, highlighting core areas of distribution. Core areas are in black, the remaining study area with prediction in grey. See text for details.
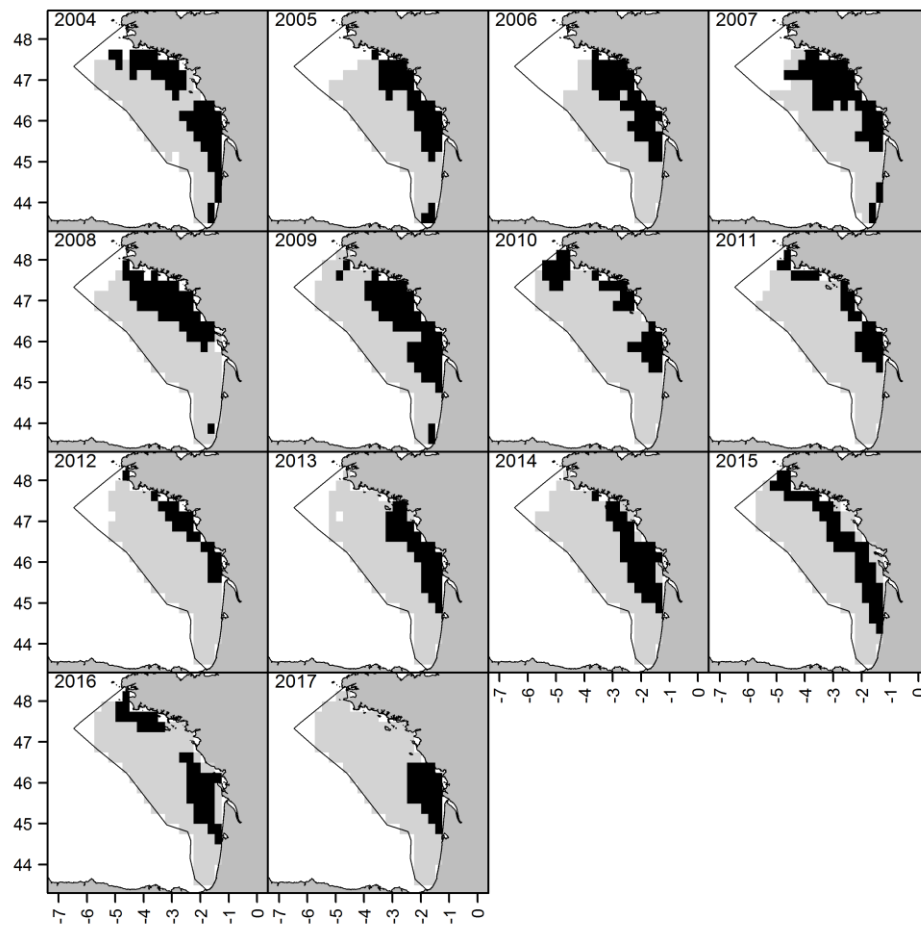

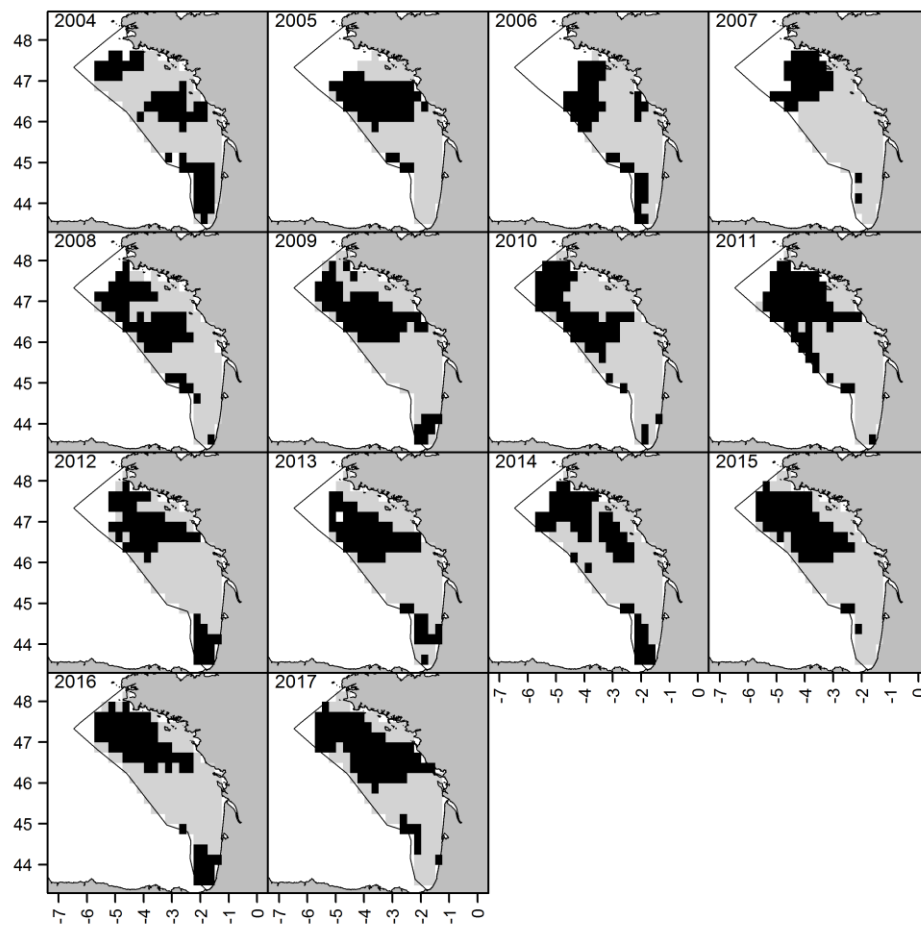

1.    Bottlenose dolphin

## 2. Black-legged kittiwake

## 3. Auks

## 4. Storm petrels

## 5. Northern fulmar

## 6.    Small-sized shearwaters

## 7.    Northern gannet
