

Supplemental figure 2

Supplemental figure 2: (A) Expression levels (log2CPM) of monocarboxylate transporters Mct1, Mct2 and Mct7 in relation to Gapdh and Bdh1. (B) Raw p-value histograms for butyrate and β OHB treated cell types. (C) Number of genes significantly altered by treatment with β OHB and butyrate (FDR $q < 0.05$). (D) Principle component analysis of β OHB and butyrate treated samples.
