Fig S4. Strigo-D2 activity in seedlings. (A) Ubiquitous expression of Strigo-D2 in seedlings. Scale bar: 500 μm. (B) Activity of Strigo-D2 in cotyledons, hypocotyls, root maturation zones and root tips. Images were recaptured from corresponding positions in (A) with higher magnification. Scale bars: 50 μm. White arrows: guard cells. Yellow arrows: pavement cells. Scale bar in magnified image: 10 μm. (C) Fluorescence intensity of mVenus and mCherry detected in different tissues or cells. (D) Intensity ratios of mVenus and mCherry in different tissues or cells.
