**Supplementary Table 1.** Sample information including sample labels, age, number of cells called by cellranger, and number of cells retained after quality control (QC) steps. Ages of foetal samples are approximate.

Sample	Alt name	Age	# cells raw	# cells after QC
F1	BRC2252	58 days	7038	3753
F2	BRC2262	61 days	5487	1470
F3	BRC2251	64 days	3540	1731
F4	BRC2263	66 days	2729	663
F5	alexsc	67 days	2486	1813
F6	BRC2256	69 days	3265	515
F7	BRC2260	80 days	10787	4109
A1	D3	55-60 years	3856	3743
A2	D4	70-75 years	1523	881
A3	D5	65-70 years	6105	4721
A4	D6	65-70 years	20889	19439
A5	D7	60-65 years	5089	4318

**Supplementary Table 2.** Typical mean results from one 6-fold cross-validation run of the foetal sample F5. A sample of 36 cells was taken from each cluster of the total dataset in this run of 6-fold cross validation. Data points can be observed in the UMAP in Supplementary figure 2.

Cell type	Recall	Precision	Balanced Accuracy
Unknown / Noise	0.306	NA	0.645
Atrial CMs	1.000	1.000	1.000
RBCs	0.944	1.000	0.972
Ventricular CMs	1.000	1.000	1.000
Immune cells	0.972	0.976	0.985
Endothelial	0.944	0.935	0.968
Endocardial	0.944	0.925	0.968
Epicardial	1.000	0.976	0.999
Fibroblast-like	0.944	0.877	0.966
Cardiac Fibroblast	0.944	0.866	0.965
SMCs / Pericytes	0.917	0.858	0.951
Cycling cells	0.972	0.817	0.975

**Supplementary Table 3.** The top 100 differentially upregulated genes of epicardial cluster 15 compared with all other clusters identified using Wilcoxon rank-sum tests on the adult and foetal integrated dataset. Genes are ranked according to their log 2 fold change against the overall dataset excluding those with log2 fold-change lower than 0.5 or a p value greater than  $1 \times 10^{-10}$ . Epicardial genes in only cluster 15 are shown in blue.

**Additional table legends (actual tables are in located separate excel sheets for ease of sharing).**

**Supplementary Tables 5a to i.** Listed gene module genes and the fraction of cells in each of the seven transcriptional states expressing each gene.

**Supplementary Tables 6a to c.** Raw expressions of Foetal, Intersect and Adult markers respectively in either foetal or adult mesothelial epicardial cell clusters (15) after parallel differential expression analysis using Wilcoxon rank-sum tests between clusters. Foetal and Adult sub-tables include log fold and p value columns of these markers within Foetal and Adult epicardium respectively for reference.
