

Supplementary Figure 2. A. T-values of ITC maps between trials of onsets without a pause vs null trials, after nonparametric cluster permutation test for control (upper) and jittered (bottom) condition. Significant clusters are indicated with higher opacity (*red*).

A.

Supplementary Figure 2. Temporal response functions across feature spaces (envelope, acoustic edges, word onsets, chunk onsets) for control (grey) and jittered (red) conditions of the 2nd and 3rd principal component.
