

*Supplementary Table 1.* Sentence materials with cloze probabilities (0-100%) of articles and nouns, along with post-noun sentence endings, comprehension questions and expected answer. N.B.: Because expectedness of the noun is here determined by the cloze value of the preceding article, there are three items (28, 29 and 49) in which the unexpected noun has a cloze that is equal to or higher than the expected noun. This has no repercussions for the statistical results because the noun-analysis was based on noun cloze.

Item	Sentence context	Expected		Unexpected		Expected		Unexpected		Sentence Ending	Question	Intended answer
		article	cloze	article	cloze	noun	cloze	noun	cloze			
												1-Y, 2-N (but see Table 2)
1	The old wives' tale says that if you want to keep the doctor away then you should eat	an	82	a	0	apple	97	carrot	0	a day.

80	With his khaki shorts and his loud Hawaiian shirt and the camera around his neck you could definitely tell that the man was	a	95	an	5	tourist	97	alien	0	in the country		

<i>Supplementary Table 2. List of changes to the materials used by DeLong et al. (2005)</i>		
Type of change	Item number	Change
Spelling	5-6	'check' > 'cheque'
	7-8	'airplane' > 'aeroplane'
Word replacement	14	'College' > 'university'
	21-22	'Dollar' > 'pound'
	22	'99-cent store' > 'Poundland'
	29-30	'Studio' > 'flat'
	34	'bike' > 'bicycle'
Phrase/Sentence change (underlined)	57	Old: <u>riding in a/an elevator/wheelchair</u> New: <u>going up a/an escalator/wheelchair</u>
	58	Old: The doctors <u>would not allow Monica to walk too soon after her surgery so the only way for her to move from place to place was in a/an wheelchair/elevator accompanied by a nurse.</u> New: The doctors <u>told Monica not to use her legs too much so soon after her surgery she often used a/an wheelchair/escalator when moving around to rest her legs.</u>
Sentence-final words	72	Original materials did not contain words after the critical noun. We added <u>even from her friends.</u>
Comprehension questions		We created new comprehension questions as those used by DeLong et al. are not publicly available. A comparison of response accuracy is therefore uninformative. In addition, analysis of the obtained responses suggested that several questions were ambiguous (in particular, items 36, 43, 57), such that what we labeled as an 'incorrect' response occurred much more frequently than for other questions, and was so consistently across labs. Our subject-level accuracy scores available on our OSF webpage ( <a href="https://osf.io/eyzaq/">https://osf.io/eyzaq/</a> ) and the lab-level scores in Supplemental Table 3 take into account the ambiguity in these items.

*Supplementary Table 3.* Detailed information about participants, trial numbers and EEG recording equipment per laboratory.

	Tested participants					Analyzed participants			EEG recording details				
Laboratory	N	N Females	Mean age (sd) in years	N familial left-handedness	Question Accuracy as % correct (range)	N	Mean N article trials	Mean N noun trials	EEG system	Channels (EOG)	Recording Reference	Online filter (Hz)	Sampling rate (Hz)
