

1 **Table S6.** Effects of warming and precipitation treatments (fixed effects) on (log  
2 transformed) Fungi:Bacteria ratios in the summer and the fall, using a mixed-effects model  
3 that included the fixed effect of time and the random effect of blocks. P values for Type III  
4 sum of squares with a Satterthwaite approximation for the degrees of freedom. Significance  
5 codes: 0.05 < P < 0.1 ‘†’.

6

	Sum. Sq.	Mean Sq.	num df	den df	F	P
<b>Precip</b>	0.0004	0.0002	2	72.013	1.538	0.221
<b>Temp</b>	0.0010	0.0003	3	72.013	2.544	0.063 †
<b>Season</b>	0.0003	0.0003	1	72.013	2.198	0.143
<b>Precip:Temp</b>	0.0006	0.0001	6	72.013	0.812	0.564
<b>Precip:Season</b>	0.0004	0.0002	2	72.013	1.695	0.191
