

Suppl. Figure S1: Regulatory relation of *nhr-67* and other homeobox genes

A: *lim-6* expression is regulated by *nhr-67* in RMEL/R but not in RIS or AVL.

B: *nhr-67* fosmid expression is controlled by *ceh-10* in RMED and by *lim-6* in RIS.

Suppl. Fig. S2: Whole genome sequencing data for *tab-1* mutant identification. A previously described mapping/sequencing approach was used (Doitsidou et al., 2010), employing the CloudMap data analysis pipeline (Minevich et al., 2012).

Suppl. Table S2: GABA-negative, *unc-47/VGAT*-expressing neurons
