

Figure 2 – figure supplement 1. Frontal EEG spectral properties across age-groups.

Frontal group-averaged (A) power spectrograms and (B) power spectra across all frequencies in children from 0-3 (n=17), 4-6 (n=23), 7-9 (n=7), 10-14 (n=18), 15-17 (n=7) and 18-40 (n=19) months of age. For power spectra: solid line, median; shaded area, 25th-75th percentile. F7 electrode presented using nearest neighbor Laplacian referencing. Epoch size of 5 minutes is used.
