

Suppl. File 4. Ebolavirus vaccine candidates in clinical testing (5,33)

Vaccine candidate	Clinical phase
rVSV-ZEBOV (recombinant attenuated replication-competent vesicular stomatitis virus vector expressing Ebola virus GP)	Phase 3
Recombinant replication-deficient adenovirus serotype 5 (rAd5) vector expressing Ebola virus and Sudan virus GP	Phase 2
ChAd3-EBO-Z (recombinant replication-deficient chimpanzee adenovirus 3 vector expressing Ebola virus GP)	Phase 1/2
Ad26-EBOV (human recombinant adenovirus 26 vector expressing Ebola virus GP) / MVA-BN Filo (replication-deficient modified vaccinia Ankara expressing Ebola virus GP) boost	Phase 1
